Krishank Dave

Maharashtra, India krishank.dave63@nmims.in in/krishank-dave github.com/KrishankDave

SUMMARY

Motivated and detail-oriented technology enthusiast with a strong interest in software development, backend systems, and Artificial Intelligence. Possess a solid foundation in programming, problem-solving, and data-driven thinking, with hands-on experience through academic and personal projects. Actively exploring Machine Learning and research-oriented work, with a passion for building scalable solutions and applying theoretical knowledge to real-world problems. A quick learner, adaptable team player, and continuously driven to grow in modern technologies and innovation.

EXPERIENCE

Volunteer

We Can We Will Foundation **May 2024 - June 2024, Kandivali , Mumbai**

- Designed and delivered comprehensive classroom sessions on MS Office and Python programming, adapting instructional methods to support diverse learning needs within under-resourced communities.

PROJECT

Sentiment Analyzer with Django

Personal Project • github.com/KrishankDave/Sentiment-Analysis • November 2025 - December 2025

- Developed a Django web application integrating TextBlob for real-time sentiment analysis and delivered instant text classification with emoji indicators and polarity details.

Turf Management Database Made Using MySQL

Personal Project • github.com/KrishankDave/Turf-Management-System • March 2025 - March 2025

- Engineered a robust MySQL database schema tailored for turf management.
- Enabling seamless user registration, real-time booking coordination, secure payment recording, streamlined collection of user feedback.

US State Crime Visualization Using Tableau

Personal Project • github.com/KrishankDave/US-State-Crime-Rate-Visulization • September 2025 - September 2025

AirBnB Data Analysis Using Python

Personal Project • github.com/KrishankDave/Airbnb-Analysis • November 2024 - December 2024

- **Airbnb Data Analysis Using Python** Analyzed Airbnb listing data using Python to identify factors influencing pricing, guest satisfaction, and property characteristics.
- Applied statistical methods including **ANOVA, Tukey's HSD, and Welch's t-tests** after data preprocessing with Pandas.
- The analysis provided insights into the impact of room type, location, day type, and host features on key Airbnb performance metrics.

EDUCATION

Bachelors in Data Science

Mukesh Patel Institute Of Technology • Vile Parle , Mumbai • 2027

CERTIFICATIONS

Google Analytics

Google • 2026

- The **Google Analytics Certification** is highly relevant for professionals aiming to build or validate their skills in digital analytics, particularly in roles related to digital marketing, e-commerce, SEO, and web analytics.

Advanced Prompt Engineering

UpGrad • 2026

- **Advanced Prompt Engineering Certification** is highly relevant for data scientists because it equips them with the skills to effectively interact with and optimize large language models (LLMs) like GPT-4 and Gemini, which are now integral to modern data workflows

Data Analytics

Deloitte • 2025

- **Deloitte's Data Analytics Job Simulation Certificate** is highly relevant for aspiring and early-career data scientists because it provides **real-world, hands-on experience** with industry-standard tools and processes used by top-tier consulting firms.

SKILLS

Technical Skills: Data Analysis and Visualization, MySQL, Artificial Intelligence, Machine Learning and AI Concepts, Python and Data Handling , Backend and Development Basics , Research and Technical Communication , Problem Solving and Learning Mindset
